Art Unit: 2816

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Roger W. Blakely (Reg. No.25,831) on 12/14/2004.

The following changes have been made to the subject application:

Claim 10, non-elected claim, has been canceled.

## Claim 7:

Line 1, "6" has been changed to --1--.;

Line 2, "a second" has been changed to --an another--;

Lines 12-13 has been deleted;

Line 35, "the current sense circuit" has been changed to --the another sense circuit--, "of claim 5" has been deleted.

## Claim 9:

Line 2, "second" has been changed to --another--.

The Examiner's amendment has been made in order to comply with the 35USC 112, second paragraph and to place the application in a condition for allowance.

2. The following is an examiner's statement of reasons for allowance: the amendment filed 11/12/2004 has overcome the technical deficiencies and the prior art of record. The prior art of record fails to teach or fairly suggest first control loop responsive to a reference voltage to clamp the first to second terminal voltages of the first and second transistor to a predetermined voltage,

Application/Control Number: 10/603,890

Art Unit: 2816

Page 3

and a second control loop providing a sense circuit output current linearly varying with the current through the second transistor as called for in claim 1, a first control loop responsive to a set voltage, mirroring a current proportional to the current through the first transistor to a second transistor while maintaining the voltages between the control terminal and the first terminal of the first and second transistors equal, and also maintaining the voltages between the first and second terminals of the first and second transistors equal, providing a current sense output responsive the current between the first and second terminals of the second transistor as called for in claim 11, controlling the first and second transistors so that the voltages across the first and second transistors are equal to a reference voltage and independent of the input current to replicate the current in the first transistor in the second transistor in a ratio of 1/N and providing an output that varies linearly proportional to the current in the second transistor as called for in claim 19. Therefore, claims 1-9, 11-13 and 19-20 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Lam whose telephone number is 571-272-1744. The examiner can normally be reached on Monday to Friday (7:30 am to 6:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TIMOTHY P CALLAHAN can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
